

Teddy Wilkin

Previously a Research Fellow at Oxford, Teddy Wilkin has spent the last 11 years working for EU Institutions setting up systems for data collection, analysis and research of mixed migration flows, including irregular migration and international protection. Currently as Head of the Data Analysis & Research Sector at the European Asylum Support Office, Teddy leads on several large projects aimed at understanding and predicting flows of asylum seekers to and within the EU so that the agency can provide targeted operational support to Member states under particular pressure, and to support evidence informed policy in Brussels.
